Re: Canadian Business Health Management Team

Recently I had the opportunity to organize a First Aid/CPR Training certification course at Gravenhurst High School. CBHM was my first choice to run the program because of the friendly and efficient customer service skills of Lisa MacKenzie and the excellent cost provided for the two day course.

I was extremely pleased with the professionalism of the course instructors. These instructors were punctual, organized and provided an endless variety of "real life" situations which kept 30 grade 11 and 12 students entertained for two full days. Cecil, the lead instructor, was more than willing to answer questions regarding his profession pertaining to being a CPR/First Aid Instructor, and paramedic. I was able to observe as a teacher that the students were engaged in the program and truly showed interest in what was being taught.

I would highly recommend this team of professionals to run programs throughout the school board system. CBHM is competitively priced, prepared and take pride in their work. I have really enjoyed working with this team and have now booked a Propane Safety Certification course through them coming up in mid-May.

Please do not hesitate to contact me for more information regarding the services provided by the Canadian Business Health Management team.

Sincerely,

Stephanie Walker
